

第54回日本てんかん学会学術集会
English Presentation Award 受賞者

演題番号	発表者	所属	演題名(英語)
ES4-8	Usami Kiyohide	Department of Epilepsy, Movement Disorders and Physiology, Kyoto University Graduate School of Medicine	Cortical neuronal activities and their network dynamics during visual recognition
ES8-2	Masuda Yosuke	The Comprehensive Epilepsy Center, University of Tsukuba Hospital	Identification of effective AEDs using the elimination half-life at VEEG
ES11-1	元木 文子	International University of Health and Welfare Graduate School of Medicine Doctoral Program	Characteristics of olfactory dysfunction and clinical profile in patients with temporal lobe epilepsy
ES13-1	中島 円	順天堂大学脳神経外科てんかんセンター	Expression of the leucine-rich alpha2 glycoprotein in the hippocampus prevents decreased cognitive function after status epilepticus
ES13-2	Moataz Badawi	Shinshu University School of Medicine Dept. Mol. Cell. Physiol.	An epilepsy associated mutation in salt inducible kinase 1 causes repetitive behavior and social deficits due to enhanced excitatory neural functions in mice.
